

# Sherline Thi Au

626-560-9550 | Denham Springs, LA | [au.sherline@gmail.com](mailto:au.sherline@gmail.com)  
[www.linkedin.com/in/sherlineau/](http://www.linkedin.com/in/sherlineau/) | [github.com/sherlineau](https://github.com/sherlineau)

Many people would describe me as someone that is dependable and a problem solver as I always believe that every issue has a solution. I always try to stay progressive in my work by growing my skill set and preparing realistic expectations for myself and others. With my technological background and being an avid gamer, I strive to provide my skills and support to any company that I hope to be offered to join.

## TECHNICAL SKILLS

**Languages:** JavaScript (Node.js), C#, C++, Python, HTML, CSS | **Frameworks/Libraries:** Express, React, Entity Framework, Flask, Jinja2, Bootstrap | **Databases:** MySQL, MongoDB | **Tools:** MySQL Workbench, Github, Git, Unreal Engine

## TECHNICAL PROJECTS

**eCalendar** | <https://ecalendar.onrender.com/>

A full stack application using React and NodeJS that allows users to create appointments.

- Constructed the server-side infrastructure using Node.js and Express to create a stable and efficient environment.
- Developed the front-end interface using React, allowing for seamless navigation and enhanced user experience.
- Utilized MongoDB and mongoose for storing and retrieving calendar appointments.
- Implemented user authentication and authorization using Json Web Tokens and bcrypt to protect user data.

**Meetups** | <http://44.201.145.71>

A full-stack CRUD application built with ASP.NET

- Created dynamic views using Razor engine, allowing for seamless navigation.
- Implemented an event management system, allowing users to create, join, and delete meetups, using ASP.NET Core and Entity Framework.
- Implemented user authentication, authorization, and encryption using ASP.NET's Identity Framework to protect user data.

## PROFESSIONAL EXPERIENCE

**Quality Verification Tester** | *Electronic Arts* | Baton Rouge, LA

2021 - 2022

- Utilized Test Rails to execute software test plans, cases, and scripts to uncover and document software bugs using Jira to maintain QA organizational goals.
- Collaborated with a team to identify high-risk components that need additional testing resources.

**Sales Consultant** | *Office Depot* | Baton Rouge, LA

2017 - 2020

- Maintained high-level product knowledge while ensuring store displays are fully stocked, correctly displayed, and priced
- Leveraged organizational skills to produce and process customer print orders with competing priorities while maintaining a strict delivery timetable.

## EDUCATION

**Coding Dojo** | *Certificate of Full-Stack Development in Python, MERN, and C#*

2022

**Southern New Hampshire University** | *Bachelor of Science in Game Programming and Development | Immersive training with C++, Unreal Engine, and 3D Modeling and Animation*

2019-2022
